About Digital Humanities

Digital Humanities at Duke University

The Digital Humanities Community at Duke promotes new ways to engage in and learn about the use of technology in humanities scholarship. This site aggregates information from various programs and initiatives around campus. The Digital Humanities Initiative @ the John Hope Franklin Humanities Institute, Trinity College of Arts and Sciences, and Duke Libraries all provide programming and support.

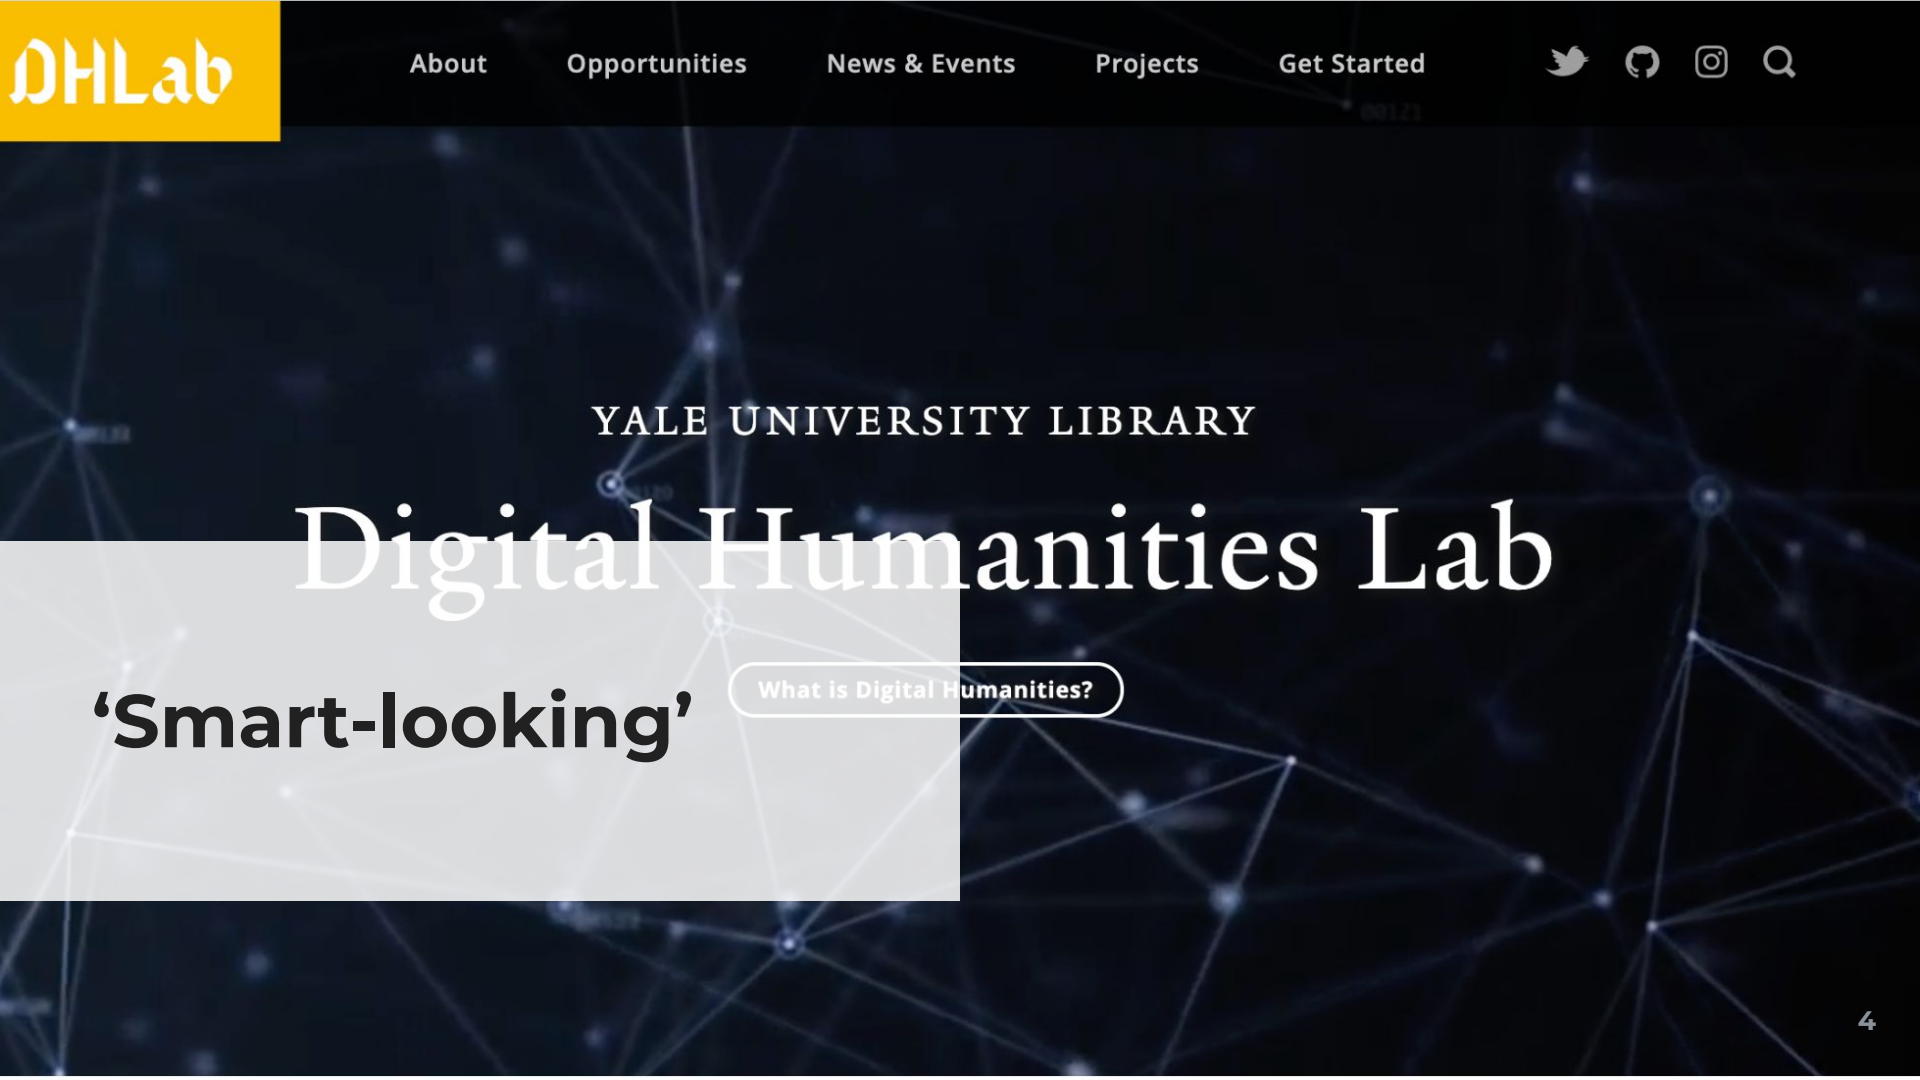
This website showcases completed and ongoing digital humanities Duke projects, spaces, and activities; promote workshops, events, and activities; and serve as a portal for exploring technology solutions for collecting, analyzing, interpreting and presenting humanities scholarship.

Our expanded idea of "digital humanities" includes digital transformations of scholarly practice and dissemination within the humanities, opportunities for interdisciplinary collaboration and innovative teaching made possible by digital tools and methods, creative and experimental uses of technology, thoughtful critique of tools, and critical study of computational media and digital culture globally.

'Very Well Researched'

Core Principles

- teaching/research/outreach connections through courses and projects
- analog and traditional, disciplinary approaches to scholarship facilitated by the digital
- innovative approaches to research, presentation, and discovery make possible by the digital
- information/data sciences connections
- critical media/tech studies and theories informing the work
- art-science and media collaborations in teaching, research, and the arts
- external project collaborations and partnerships: local, regional, and global

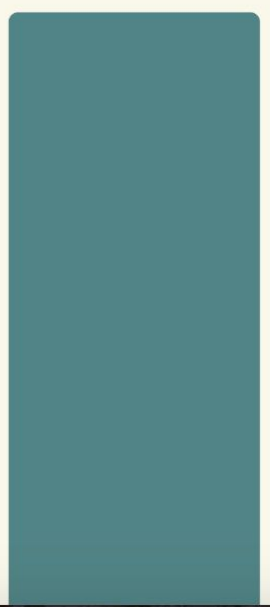


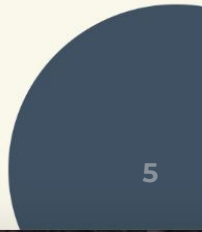
‘Smart-looking’

Advancing the humanities with code, communication, and community.

Awesome
Color design

We are a vibrant community of practitioners who use state-of-the-art digital tools to enrich education and research in the humanities. Our programs integrate digital and humanities education, teaching, and research.





1. minimalistic
2. Clean design
3. Visual elements
4. D3 animation?

3 things to include

- Horizontal scroll/click bar
- Use of shapes/diagram
- Footer design
